I.R.I.S.™
Inmate Recognition & Identification System

Innovative Biometric Technology & Data Sharing

The Inmate Identification & Recognition System (IRIS™) is implemented through the nation's only secure, encrypted, real-time national criminal justice sharing network, based on iris biometric technology, which enables law enforcement agency staff to positively identify criminals in seconds.

IRIS™ WAS DEVELOPED IN COLLABORATION WITH THE NATIONAL SHERIFF'S ASSOCIATION TO POSITIVELY IDENTIFY INMATES USING THE MOST ANATOMICALLY UNIQUE BIOMETRIC, THE IRIS.
