IMATSTM
Total Inmate Control

IMATS™

Total Inmate Control

IMATS™ Screens Provide Easy Access to Vital Inmate Information

Finally, a fully functional, affordably-priced, proven, cloud-based (SaaS) jail management system from a trusted vendor who will not nickel and dime you every time you need help with your system.

Effective and efficient corrections management begins with access to detailed information about every inmate in your custody.

The **Inmate Management and Tracking System (IMATS™)** gives you Total Inmate Control™ by capturing detailed information on every inmate in your facility, and providing real-time accurate information.

IMATS™ is a total corrections solution that is inexpensive, simple to install, and easy to use.

Most importantly, IMATS™ fits seamlessly into existing facility operations, allowing staff to manage operations easily and more efficiently.

IMATS™

Total Inmate Control

IMATS™ is a fully integrated SaaS application for Sheriffs' Jails and Corrections Facilities of all sizes. With more than two decades of proven success in some of the nation's largest and smallest jails, the completely configurable Jail Management System (JMS) includes over 50 modules that are designed to be customized to meet your unique needs. Available modules include:

Powerful Correctional Management Software

Our cloud-based (SaaS) IMATS™ system can be configured for facilities as small as five beds to the nation's largest multi-facility operations.

100% Cloud-Based (SaaS)

IMATS™ is a cloud-based platform that simplifies deployment, maintenance, upgrades, and agency access to the JMS. Some of our multi-facility agency customers have enabled their surrounding police departments, warrant, and civil service deputies, and related agencies to access the JMS via secure web connections.

Comprehensive Functionality

IMATS™ supports all jail operational requirements. Most competitor products cover the basics of inmate intake, movement, and release. IMATS™ provides additional functions that are critical to inmates, officers, and public safety to include: critical medical and gang-related information and a fail-safe release system.

Affordable

IMATS™ is a fully functional jail management system that is affordably priced, proven (since 1995), cloud-based (SaaS) system from a trusted vendor who will not nickel and dime you every time you need help with your system.

IRIS Recognition

IMATS™ integrates BI² Technologies' cutting edge Inmate Recognition and Identification System (I.R.I.S.™), which positively identifies inmates and visitors through cutting edge iris biometric recognition technology, regardless of the jurisdiction where they were initially enrolled in I.R.I.S.™.

Created By Nationally Recognized Correction Experts

IMATS™ was created by BI² Technologies (Biometric Intelligence and Identification Technologies), a recognized leader in the development and implementation of cost-effective, SaaS multimodal biometric identity and jail management solutions.
